Variation in and Correlation between Intrinsic rate of Increase and Carrying Capacity

Nora Underwood

January 2007

The American Naturalist

Purpose of Study

- Information about variation in intrinsic rate of increase and carrying capacity, as well as the correlation between these parameters, is necessary in order to fully understand the dynamics of a given population.

Questions

Variation in and Correlation between Intrinsic rate of Increase and Carrying Capacity

Nora Underwood

January 2007

The American Naturalist

Purpose of Study

- ▶ Information about variation in intrinsic rate of increase and carrying capacity, as well as the correlation between these parameters, is necessary in order to fully understand the dynamics of a given population.

Questions

1. Is there a difference in the growth rate or in equilibrium population size of aphids when placed in different environments that vary in host-plant genotypes?
